

Raider TG is a unique spray adjuvant designed to improve plant uptake of foliar-applied pesticides and nutrients and other materials designed for systemic absorption by plants.

Raider TG is formulated with **Floratine's** patented agent to promote:

QUICK ABSORPTION

WIDER SPRAY WINDOWS

LOWER CHEMICAL CONCENTRATIONS

Raider TG assures maximum efficiency of applied materials, particularly in marginal weather conditions and with large molecule chemicals.

ACTIVE INGREDIENTS

Polymerized Pyrophosphate Surfactant Emulsifier Blends	26.100%
Diglycol Sterates	0.173%
5 phosphomevalonate, Isopentnyl Farnesyl Pyrophosphate	0.003%
Inert	73.724%

Net Weight: 9.81 lb/gal / 1.176 kg/L

PROFESSIONAL USE GUIDELINES ⑨

Tank mix **Raider TG** with any spray material designed to be absorbed by plants. Generally, **Raider TG** can be used with any type of equipment that delivers the correct amount of material to the target area. **Raider TG** should be applied at the specific rate of 0.5 fl oz / 1000 sq ft (5 L/ha), regardless of the total spray volume to be applied.
